Art Unit: 2157

1. Claims 12-22 are presenting for examination.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 12-22 are rejected under 35 U.S.C. 102(e) as being anticipated by

Broadhurst (US Pat. No. 6,560,634).

5. As to claim 12, Broadhurst shows in Fig 1, a network request method comprising:

- receiving a request (search request) to process input including a resource identifier (domain name) unavailable for registration, see col 5, lines 31-32;
- providing a user with an interface to one of a perform a resource identifier aftermarket request (subsequent query), see col 6, lines 29-30, and one of an access and display aftermarket status of the resource identifier, see col 6, lines 38-43; and
- performing the aftermarket request independent of providing the interface after receiving the request to process the input, see col 6, lines 29-30.

Art Unit: 2157

6. As to claim 13, inputting the resource identifier (domain name) from a user interface element, see col 3, lines 26-29, lines 35-37.
7. As to claim 14, inputting the resource identifier (domain name) into one of browser location field, command line, see col 3, lines 35-37.
8. As to claim 15, performing the resource identifier aftermarket request, see col 6, lines 29-30.
9. As to claim 16, performing WHOIS request, see col 6, lines 29-35.
10. As to claim 17, providing the user with the interface, see col 2, lines 48-52, col 6, lines 38-43.
11. As to claim 18, receiving a search engine request, see col 5, lines 17-20.
12. As to claims 19-22, the claims are similar in scope to claims 12-18, and they are rejected under the same rationale.

Therefore, it can be seen from the above that Broadhurst anticipates claims 12-22.

13. The applicant argues in his remarks that Broadhurst does not teach processing a request having a resource identifier which is specifically not available for registration.

13.1. In response to the above argument, Broadhurst teaches processing a request having a resource identifier which is specifically not available for registration, see col 5, lines 31-32.

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2157

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
